Note that this is a chart of general features. Each program includes additional features unique to itself and beyond the ability to just Scan and Read. Some programs integrate with an email program, some that don't include a dictionary in the program itself offer it as a separate program if needed. The output features on Read and Write Gold are subject to the software program you are using it with.

\* Please note that some software programs may contain features not represented in this chart. This chart was created based on the use of the programs, demos and/or literature provided. This chart will be updated as information is shared with us.
