TALKING BUDDY		\$95.00	Saltillo	20 seconds of recording time On/off volume dial Can use one external switch Battery: 9V (included) 12 month warranty - Instructions included Size 4.5" in diameter, 2" high Activation area 4.5 inches in diameter Weight 9.5 oz. Available in yellow or red	Needs met by single message Motivated by voice output or cause & effect Gross motor skills
TALKING BRIX COMMUNICATORS		\$99.00 Set of 3	Ablenet	Single 10 seconds recording device Connectable customizable layouts Magnetic Power on/off switch Rechargeable battery (built-in) 2.56" x 2.56" x 0.6" (L x W x H) 1.8" Activation area Snap Switch Cap included	Needs met by single message Motivated by voice output or cause & effect Need for transition from single to 2 or 3 messages Good basic motor skills Need for voice output in close proximity to activities, situations or wants/needs.
SAUCER DOME SAY IT PLAY IT		\$103.95	Enabling Devices	Single 20-second message. When dome pressed, message plays, device vibrates, shapes swirl, and external appliance activates. Size: 8"W x 4 1/2"H. 6 AA batteries.	Needs met by single message Motivated by voice output or cause & effect Need for visual and/or tactile feedback Gross motor skills
CHIPPER		\$104.00	Adaptation	1 button, single message communication aide. 20 seconds record time. External switch jack. Relay (toy/appliance) jack. Adjustable volume. Size: 3.5 x 3.5 x 2.25 inches. Requires 9-Volt battery.	Needs met by single message Motivated by voice output or cause and effect Gross motor skills
TALKING ALERT TALKING ALERT WITH 12 LEVELS		\$114.95 \$126.95	Enabling Devices	Activation surface is textured lens. Message plays while bright light shines. Single level model holds one 20-second message; 12 level model holds 12 24-second messages. Size: 7 3/4"W x 2 1/2"H. 4 AA batteries.	Symbolic level Needs met by single message Motivated by voice output Need for visual feedback
BIGmack		\$115.00	Ablenet	Digitized speech. 1 message, 20 seconds. Volume control. On/off switch. Jack for connection to external toy or appliance Switch relay (cable included). 5" round activation area, 2 1/4" high, 1 lb. Requires 9-Volt battery.	Needs met by single message Direct select in large space Motivated by voice output or cause & effect Needs immediate reinforcement

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
LITTLEmack		\$115.00	Ablenet	Same features & capabilities of BIGmack. Active area 2.5" diameter. Jack for connection to external toy or appliance. Requires 9-Volt battery.	Needs met by single message with possible need of multiple messages Direct select, gross motor Need access at angle See BIGmack
STORY TELLER		\$128.95	Enabling Devices	Single 20-second message. Spinning disk holds any small object. Oval textured activation plate. Lights and spinning disk activated with message. Size: 12 1/2"L x 9 3/4"W x 4 1/2"H. 4 AA batteries.	Object or symbol level Motivated by voice output Need for visual feedback
LEX		\$159.00	Adaptation	Single message device with storage for up to three 20-second messages on 3 levels. Designed to be paired with TalkingMyWay Object Communication cards, but can be used without that product. 5"x7" keypad. 4-AAA batteries (included).	Object or Symbolic level Motivated by voice output Needs met by single messages Gross motor skills
PROP HOLDER COMMUNICATOR		\$200.95	Enabling Devices	1 message 30 seconds per message total of 210 seconds 7 levels Stick holds most sizes of graphics and moves when activated with voice output switch plate. Can be latched, timed or momentary output Oval activation area Useable with external switch 7" H x 9" D x 6 1/2" W 4 AA batteries	Photo or symbolic level Need for visual feedback or reinforcement Need learning supports

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Sequencers & Randomizers

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
STEP PAD		\$29.00	Attainment	72 seconds of recording time. Up to 15-step sequence. Play, forward and rewind function. Pocket-sized. 3.5" x 2.125" x .375"	Good fine motor skills Need device that does not call attention to itself Need portability especially for ambulatory
SMALL TALK SEQUENCER		\$96.95	Enabling Devices	Up to 250 messages 350 seconds recording time Random capability Volume control Clear cover for activation area to hold icons Can be activated by external switch 6¼"L x 6¼"W x 3"H. 4 AAA batteries.	Limited motor skills Participate in simple conversations, communication routines (jokes, interviews, surveys, announcements, etc. Need for teaching prompts Need for reminders Need for directions
MINI-COM SEQUENCER		\$104.95	Enabling Devices	Use individually or join with basic Mini-Coms. Repeated activation plays sequenced messages. Total of 300 seconds recording time. Size: 5 ½"L x 6"W x 3"H. 4 AA batteries.	Limited motor skills Ability to participate in communication routines
HIP STEP-TALKING SEQUENCER		\$105.95	Enabling Devices	300 seconds total record time. Activate series of messages by tapping a single button for each message in a sequence. Nylon zippered fanny pack to carry at waist or across body. Size: 6 ¼" x 2 ¼" x 3 4 AA batteries. Set of 5 replacement waist packs available.	Good motor skills Ability to participate in sequenced routines such as storytelling Need for portability Need device that does not call attention to itself Participate in simple conversations interactions
STEP TALKING SEQUENCER SWITCH PLATE		\$117.95	Enabling Devices	Expresses a series of pre-recorded messages when device is activated repeatedly. 300 seconds recording time. Size: 10 ¼"L x 7 ¼"W x 3"H. Requires 4 AA Batteries.	Participate in simple conversations, communication routines (jokes, interviews, surveys, announcements, etc. Need for teaching prompts Gross motor skills Emerging interactive skills
MULTI-COMS OVAL RECTANGULAR		\$118.95 \$139.95	Enabling Devices	12 levels, 4 messages per level, total of 48 messages. 300 seconds recording time. Rectangular models can be attached together for choices, sequencing. Slot or platform for storing picture, object. 4 AA batteries  <b>Oval</b> 10" x 10"  <b>Rectangular</b> 9" x 10"	Limited motor skills Needs met by single message with possible need of multiple messages Object or symbol level Motivated by voice output Need for visual feedback Possible need for sequencing

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
GOOSHY STEP TALKING SEQUENCERS		\$119.95	Enabling Devices	Expresses a series of pre-recorded messages when device is activated repeatedly. 300 seconds recording time. Size: 10" x 4½" x 2". Requires 4 AA Batteries.	Participate in simple conversations, communication routines (jokes, interviews, surveys, announcements, etc.) Need for teaching prompts Gross motor skills Emerging interactive skills Need for tactile/visual feedback
RANDOMIZER		\$135.00	Adaptation	Plays pre-recorded messages in random order. Two message levels, 90-seconds of recording time. Relay/switch output for activating external devices. Switch jack for activating with external switch. 3.5"x3.5"x2.25". 9-volt battery (included).	Symbolic level Motivated by voice output Need randomized messages to participate in leisure opportunities
SENSIBALL STEP TALKING SEQUENCER		\$139.95	Enabling Devices	Expresses a series of pre-recorded messages when device is activated repeatedly. 300 seconds recording time. Size: 6" x 6". Requires 4 AA Batteries.	Participate in simple conversations, communication routines (jokes, interviews, surveys, announcements, etc.) Need for teaching prompts Gross motor skills Emerging interactive skills Need for tactile feedback
TEXTURED ROLLER STEP TALKING SEQUENCER		\$141.95	Enabling Devices	Expresses a series of pre-recorded messages when device is activated repeatedly. 300 seconds recording time. Size: 11" x 4½" x 2". Requires 4 AA Batteries	Participate in simple conversations, communication routines (jokes, interviews, surveys, announcements, etc.) Need for teaching prompts Gross motor skills Emerging interactive skills Need for tactile feedback
SWITCH EASEL STEP TALKING SEQUENCERS		\$142.95	Enabling Devices	Expresses a series of pre-recorded messages when device is activated repeatedly. 300 seconds recording time. Size: 9¾" x 8¾" x 2½". Requires 4 AA Batteries	Participate in simple conversations, communication routines (jokes, interviews, surveys, announcements, etc.) Need for teaching prompts Gross motor skills Emerging interactive skills
SEQUENCER		\$154.00	Adaptation	1-button sequential messaging. Record and activate a series of messages 2 levels. Digital recording. with 45 seconds of record time per level (short play) or 90 seconds of record time per level (long play) speaker, switch and relay jacks (control external devices). Adjustable volume. Size: 3.5" x 3.5" x 2.25 <b>10 oz.</b> 9-Volt battery.	Limited motor skills Ability to participate in communication routines Need for teaching prompts Need for reminders Need for directions

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
BIG TALK TRIPLE PLAY		\$154.95	Enabling Devices	Single, sequential, and random message capability with output for activating other devices. 4 levels, 75 seconds of messages per level for 300 total seconds of recording time. Can be activated by external switch. 4 AA batteries.	Limited motor skills Needs met with single message. Participate in communication exchanges/routines. Need for sequential prompts/directions Need for randomization of messages for participation in games
STEP-BY-STEP COMMUNICATOR BIG LITTLE With levels		\$160.00 \$160.00 \$160.00	Ablenet	Record and activate series of messages. 1st activation plays 1st message, 2nd activation plays 2nd message, etc. Up to 75-seconds of recording. Toy/ BIG: activation area of 5" LITTLE: activation area of 2.5" WITH LEVELS: activation area of 2.5" Requires 9-volt battery.	Limited motor skills Participate in simple conversations, communication routines (jokes, interviews, surveys, announcements, etc. Need for teaching prompts Need for reminders Need for directions
PARTNER PLUS/ STEPPER		\$165.00	AMDi	Record-activate message series in sequence 3.5 square inch membrane panel Reverse mode to step backwards in sequence Repeat mode to continually repeat any single stored message Reset function to restart from beginning One input jack for external switches One output jack to control external devices Optional carrying case available Standard message length of 60 seconds total Square picture size-activation area of 3.5 inch	Limited motor skills Ability to participate in communication routines Motivated by voice output Need for teaching prompts Need for reminders Need for directions
ADJUSTABLE ANGLE SEQUENCER W/SWITCH		\$170.95	Enabling Devices	Sequential recorder with circular patterned red LED lights in the center for visual cue for targeting and encourage the user to activate the switch. The angle of the big 5" switch is adjustable from 32 degrees to 90 degrees. The light can be turned on or off. Total of 300 seconds recording time and can be clamped. Also works as a switch. Size: 8"L x 8"W x 6 1/4"H. Requires 4 AA Batteries	Visually Impaired Limited motor skills Ability to participate in communication routines Motivated by voice output Motivated by visual stimulus
TALKING MAGIC ROLLER		\$189.95	Enabling Devices	Sequential recorder for recording and playing unlimited segments within 5 minute period. Sequencer plays when roller is spun, external switch activated, or roller is taken from base and played with on table or floor. Lights shine & roller vibrates during message activation. Roller Size: 6"x 6"H. 4 AA Batteries. Base Size: 8 1/2"L x 12"W x 5"H. 2 AA Batteries.	Limited motor skills Ability to participate in communication routines Motivated by voice output and the device's toy-like appearance and function

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
ANNOUNCER W/ 6LEVELS  ON GOOSENECK		\$259.95  \$279.95	Enabling Devices	6 level sequencer with level changer 5 second messages 300 seconds record time Playback delay of 1 – 5 seconds Auditory Cueing permits user to hear series of prompts and select one by activating device Jack for external switch Size: 26" H x 6" W 4 AA Batteries Tabletop or available on a 24" gooseneck	Gross motor skills or limited motor skills Visually impaired Need for auditory scanning or prompting Need for reminders, directions or prompts Participate in communication routines Motivated by voice output
CHICKADEE -1 LEVEL		\$395.00 \$	Unlimiter Saltillo in USA	Digitized speech device with single button (3.5" diameter) access with additional single switch or two switch step scanning (switches not included). Random mode for games etc. Both visual & auditory scanning. Headphone jack. Volume dial. Messages remain with dead/removed battery. 8 minutes recording time. 2 external jacks to activate battery powered toys/appliances 2 AA batteries. Visual Cues: 12 lights around perimeter of the round top, each LED corresponding to a single message being played. 12 message recordings on one level Auditory Prompting -	Limited motor skills Participate in social interactions and routines Need for reminders or social prompts Need for direction Need for auditory prompting Need for scanning visual or auditory Need for visual supports Gain attention

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Two Message Devices

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
VOICE-OVER WALLET		\$18.95	Silver Lining Multimedia, Inc	3 zippered clear pouches which each can hold photo and Voice-Over. VELCRO closure, and hook for hanging. Comes with 2 Voice Over devices and 4 basic needs cards (thirsty, tired, hungry, and bathroom)	Fine motor skill for activation Motivated by voice output Portability Needs met by three messages Situational communication
ROCKING TWO MESSAGE COMMUNICATOR WITH LIGHT		\$73.95	Enabling Devices	Two 10-second messages. Two 2" x 2" frames attached to switch plate. Light turns on for visual cue when device activated. Size: 5"L x 6"W x 1 1/2" H. 4 AA batteries.	Symbolic level Needs met by two messages Gross motor skills Motivated by visual reinforcement Need reinforcement
CLIP TALK		\$79.95	Enabling Devices	1 twenty-second or 2 ten-second messages. Activate with built in switch(es). Very small box contains a spring-reinforced clip. Snaps onto any tubular or rectangular object (non-slip lining). Available with jacks. Size: 6 1/2" x 4" x 5 1/4". Lightweight. 4 AA batteries.	Need for 1 or 2 messages Motor skills to direct select or activate switch Need for communication while in bed or using walker, stroller or wheelchair. Need to move system to different locations
TALKING ROCKING PLATE		\$96.95	Enabling Devices	ROCKING PLATE: Direct select. 2 messages (10 seconds each). Requires only light or momentary pressure. Suction cups for adherence to table. Size: 14"L x 6"W x 2 1/2" H (lower in front). Requires 4 AA batteries.	Needs met by 2 messages Motivated by voice output Can activate switch Differentiates between 2 selections Indicates preference
ROCKING SAY IT PLAY IT		\$102.95	Enabling Devices	Direct select. 2 messages (10 seconds each). Requires only light or momentary pressure. Suction cups for adherence to table. Size: 14"L x 6"W x 2 1/2" H (lower in front). Requires 4 AA batteries. External jack for capacity to activate message and toy simultaneously.	Needs met by 2 messages Motivated by voice output Can activate switch Differentiates between 2 selections Indicates preference Motivated by novelty or play
HIP TALK 2 messages		\$104.95	Enabling Devices	2 ten second messages of digitized speech. Nylon zippered fanny pack to carry at waist or across body. Large recessed switch plates. Size: 6 1/4" x 2 1/4" x 3 1/4". Requires 4 AA Batteries. Set of 5 replacement waist packs available.	Symbolic level Needs met by 2 messages Good gross motor skills Need portability especially for ambulatory Need device that does not call attention to itself Backup for use with physical activities

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
TWIN TALK TWIN TALK & PLAY		\$105.95 \$136.95	Enabling Devices	2 direct select 10 second messages. Adjustable divider insert between 2 message plates (3" x 5"). Size: 13" x 6 1/2" x 2". Requires 4 AA batteries. TWIN TALK & PLAY: Switch relay activates message & toy or appliance simultaneously.	Symbolic level Needs met by 2 messages Poor motor skills Motivated by voice output Differentiates between 2 selections Indicates preference
TALKABLE II		\$109.95	Enabling Devices	Two messages 10 seconds per messages Built-in icon holders above each of the 2 activation plates or clear covers hold symbols on device Each activation plate corresponds with an output jack for activating external device. Size 7 1/2" x 4 1/2" x 3" 4 AAA batteries	Symbolic Level Needs met by 2 messages Motivated by voice output Limited motor control
COMPARTMENT COMMUNICATOR 2-Compartment		\$124.95	Enabling Devices	Training or communication system. Plastic inline 2 compartments large enough to slip hand into arm slot switch which activates message and lights. Icon holder and space for objects. 5 seconds per message. Requires 4 AA batteries. Size: 1' x 10 1/2" x 3"	Needs met by 2 messages Need for communication training Aids with poor motor control Need for association of object and word
ITALK2 COMMUNICATOR With Levels		\$145.00 \$196.00	Ablenet	Dual-message communicator 8.5 seconds of recording time per round 2.5" activation surface. Includes dual toy/appliance jacks with cables. Volume control and ON/OFF switch. Built in symbol storage compartment. Two <a href="#">Snap Switch Caps</a> . 9-Volt battery. Instructions on bottom. Levels: 3 levels	Emerging communicator Direct selection basic motor skills Participate in interactive situations

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Three Messages Devices

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
COMPACT COMMUNICATOR 3-MESSAGE		\$92.95	Enabling Devices	Platforms at top of activation plate for objects and groove for storing pictures/symbols. Light shines when message activated. Messages up to 5 seconds each. Size: 9"L x 6"W x 1 1/2"H 4 AA batteries.	Object or symbolic level Needs met by 3 messages Motivated by voice output Gross motor skills Motivated by cause and effect
TALKABLE III		\$119.95	Enabling Devices	Three messages 5-second each message. Built-in icon holders above each of the 3 activation plates or clear covers hold symbols on device Each activation plate corresponds with an output jack for activating external device. Size: 10 1/2" x 5" x 2 3/4" 4 AA batteries.	Symbolic Level Needs met by or 3 messages Motivated by voice output Motivated by cause and effect Limited motor control
COMPARTMENT COMMUNICATOR 3-Compartment		\$159.95	Enabling Devices	Training or communication system. Plastic inline 3 compartments large enough to slip hand into. Arm slot switch activates message and lights. Space behind switch plate allows for placing objects, pictures or words. 5 seconds digitized speech per message. 4 AA batteries. Size: 14.5" x 11.5" x 3.25"	Needs met by 3 messages Need for communication training Aids with poor motor control Need for association of object and word
GROOVED PLATFORM COMMUNICATOR WITH MESSAGES & LIGHTS		\$163.95	Enabling Devices	3 five-second digitized speech messages. 3 switch plates that activate lights and messages. Objects or pictures can be placed on front or back. Size: 16 1/2" x 12" x 3 1/2". Requires 4 AA batteries.	Needs met by 3 messages Need for communication training Poor motor control Needs concreteness of objects or association of objects and symbols, words Motivated by voice output

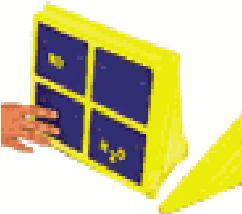

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Four Messages Devices

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
TALKING POCKETS WALLET CARRIER 4 Carrier 8 Carrier  TALKING POCKETS (sold separately)		\$15.95 \$19.95 \$12.95	Augmentative Resources	Nylon wallet with clear plastic to hold Talking Pockets Voice-Overs. (Sold separately) Webbing strap and Velcro tab to hook to belt or belt loop Velcro tab for opening and closing 4 Carrier 4" x 3 1/2" 8 Carrier 4" x 6 3/4"	Fine motor skill for activation Motivated by voice output Portability Needs met by 4 to 8 messages Situational Communication
ONE BY FOUR TALKER  CLIP TALKER (see single message devices)		\$69.00 \$12.00	Attainment	<b>One by Four</b> consists of 4 Clip Talkers in sturdy press-&-play case. Clip Talkers can be removed for individual use. Transparent pockets hold symbols & are pressed to play message. Clip Talker single message device with 10 seconds recording time. Size: 1 1/2" x 2 1/2" x 1/2".	Symbolic level Need met by four messages Good fine motor skills Meets situational needs Need portability, especially for ambulatory  Expanding communication skills
TALKBOOK FOUR  GoTalk Ones (see single message devices)		\$69.00 \$12.00	Attainment	Includes vinyl folder 13 1/2" x 6 1/2" and four GoTalk Ones. Transparent pockets that holds four removable GoTalk Ones (size: 2 1/4" x 4 3/4" x 1/4"). Single-message devices with 10 seconds of digitized speech recording. Each accommodates icon and has large play button.	Symbolic level Need met by four messages Good fine motor skills Meets situational needs Need portability, especially for ambulatory Expanding communication skills
CHEAP TALK SWITCH MODULE 4 Jacks		\$83.95	Enabling Devices	External switches activate 1 of 4 messages. Easy recording of up to 5-second messages on. Size: 3 1/2" x 6" x 2 1/4". Requires 4 AA Batteries.	Symbolic level Can activate switch Needs met by 4 messages Motivated by language or voice output Attends to linguistic output Participation in group activities
PALM SAY IT PLAY IT		\$85.95	Enabling Devices	When switch plate pressed in one of 4 directions, activates one of four messages and activates an external appliance. 20 seconds total recording time. Comes with four cords for activating appliances. 9" x 4" x 3 1/2"	Needs met by four messages Motivated by voice output or cause & effect Gross motor skills

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
PUT-EM-AROUNDS Four Message		\$87.95	Enabling Devices	Wall-mounted four-message device (can be used on tabletop). 20 seconds recording time. Press in corresponding corner of plate to record. Wall mounting hardware included. Size: 7"L x 9"W x 1 1/2"H 4 AA Batteries.	Symbolic (or word) level Meets situational needs Needs met by four messages Motivated by voice output or cause & effect Gross motor skills Mobility for use as wall mounted device
TALKPAD		\$99.00	Frame Technologies	Four digitized messages 15 seconds. Clear plastic moisture guard included which can serve to hold symbols in place. Four different color message buttons @ 1 3/4" each. Size: 9" X 5.5" including carrying handle, 1lb. Requires 3 AA batteries.	Portability Direct Select Need for four or less messages Poor to average gross motor skills
COMPANION COMMUNICATOR		\$99.95	Enabling Devices	Four message, 5 seconds each. Buttons covered with clear durable cap for holding symbols. Attached with belt clip or held by loop. Size: 3 3/4"L x 3"W x 1 3/4"H. 4 AAA batteries.	Symbolic level Good visual skills for seeing small icons, or good memory for message location Fine motor skills Need for portability
COMPANION 401 COMMUNICATOR		\$100.00	Luminaud	Digitized speech. 20 seconds, 4 messages. Button-activated. Pictures must be small. Memory lasts if battery fails. On/off switch. Size: 5.3" x 4" x 2", 12 oz. Requires 9-Volt battery.	Needs met by 4 messages Good vision, reading or Braille skills Attends to linguistic output Motivated by voice output Fine motor skills

TALKABLES IV  TALKABLES IV LEVELS		\$129.95  \$195.95	Enabling Devices	4 messages 5 seconds each messages Built-in icon holders above each of the 4 activation plates or clear covers hold symbols on device Each activation plate corresponds with an output jack for activating external device. Volume control 14"L x 5½"W x 2¾"H. 4 AA batteries LEVEL: 12 levels	Needs met by 4 messages in some situations Can direct select in 2" x 2" space Motivated by voice output Attends to linguistic output Can differentiate between 4 Symbolic level Limited motor skills Need for larger icons
BASIC TALK 4		\$129.95	Enabling Devices	Four light-touch message squares. 5 seconds or recording time per message. Slide-in overlay track. 25 degree angle. Portable and lightweight. Black or Platinum. Size: 11"L x 4"W x 2 ¾"H. 4AA batteries.	Symbolic level Needs met by four messages Gross motor skills
TALKING 4 COMPARTMENT SCANNER		\$136.95	Enabling Devices	Four 5-second messages on 12 levels (total recording time of 300 seconds). Four scanning modes: inverse, auto, two switch, and step scan with three different scan speeds. Recordable level announcer. Size: 14" x 9" x 5". Requires 4 AA batteries.	Needs met by 4 - 48 messages Gross motor skills Visual attending skills Object-word association Motivated by voice output Ability to use switch(es)
SUPER WRIST TALKER		\$169.95	Enabling Devices	12 levels Four 5-second Messages per Level Color Coded Button System Adjustable Wrist Strap 4"L x 2 1/8"W x 1"H. Requires 2 AAA Batteries.	Symbolic level Needs multiple messages in small sets of four messages Fine motor skills Need for portability Need for easy access
GOTALK 4+		\$179.00	Attainment	Four 3" square message buttons, 5 recording levels. Two "core messages" at top of device remain constant when levels change. Total of 4.5 minutes of recording time. Volume control 9" x 12" x 1 1/8", 23 ox. Requires 2 AA batteries. Has built-in handle, key guard, and overlay storage. Carry Stand available separately. GoTalk Overlay Software available separately.	Symbolic level Needs multiple messages in small sets of four messages Fine motor skills Need for portability Need for larger icons (3" square)

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
<b>LANGUAGE FACILITATOR</b>		\$189.95 \$249.95	Enabling Devices	30 seconds recording time for each of 4 squares. User can watch self in the 11" x 15" mirror while lights around the rim help individual to visually attend. Size: 12"L x 12"W x 17"H. Requires 4 AA Batteries. Also available with 12 levels, 6 seconds of recording time per message, for a total of 300 seconds.	Symbolic level Need for visual feedback Motivated by auditory stimulus Good basic motor skills Motivated by voice output or cause & effect Motivated by novelties
COMPARTMENT COMMUNICATOR 4-Compartment		\$189.95	Enabling Devices	Training or communication system. Plastic inline 4 compartments large enough to slip hand into. Arm slot switch activates message and lights. Space behind switch plate allows for placing objects, pictures or words Digitized speech of 5 seconds per message. AA batteries. Size:: 19" x 10" x 3"	Needs met by 4 messages Need for communication training Aids with poor motor control Need for association of object and word
FOUR COMPARTMENT COMMUNICATOR with levels scanning		\$189.95 \$209.95	Enabling Devices	Four 5-second messages. Symbols mounted upright under LED light. Platform for objects behind activation plates. Size: 18"L x 10"W x 6"H. 4 AA batteries. SCANNING: Linear scanning with external switch. 12 levels.	Needs met by 4 – 48 messages Object or symbol level Motivated by voice output Gross motor skills Can use switches
ROUND CHEAP TALK 4		\$194.95	Enabling Devices	Round device with 12 levels with four 2"x2" message locations with 300 seconds total recording time. 19" gooseneck and universal clamp set-up included.	Needs met by 4 messages in some situations Can direct select in 2" x 2" space Motivated by language output Attends to linguistic output Can differentiate between 4
SUPER-SIZED COMMUNICATOR WITH LEVELS		\$204.95	Enabling Devices	Each compartment has own switch for direct selection. Option for linear scanning with external switch. Adjustable scan rate. 12 levels of four 5-second messages. Size: 28"L x 11 1/2" x 4 1/4"H. 4 AA batteries	Needs met by 4 – 48 messages Object or symbol level Motivated by voice output Gross motor skills Can use switches

Separate volume control for auditory feedback. 4 Input jacks for single-switch access to any specific location 1 output jack. Built-in overlay storage. Rechargeable battery pack with A/C adaptor or 4 AA batteries. *More recording time available with purchase of memory modules. Mounting Options Available</p> <p><b>Deluxe</b> additional Eight minute-memory module. tote bag. 2 Jelly Bean switches 12 additional overlay sleeves. Additional color-coded labels for -use with memory module &amp; overlay sleeves. 4 AA batteries travel strap for shoulder</p>	Presymbolic to symbol level Simple motor skills Direct select Need for limited to numerous messages Need to augment other system Emerging interactive skills Requesting Need for visual support Need for scanning

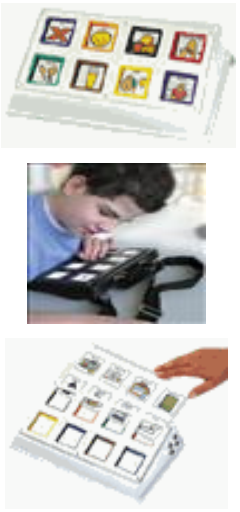

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Five to Seven Messages

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
PORTABLE CLEAR COMMUNICATION DEVICE WITH OPTIONAL VOICE OUTPUT		\$14.95	Augmentative Resources	Clear vinyl carrying case with Velcro closure and webbing handle. Inner, removable thick black plastic board with loop Velcro strips on both sides. Use with icons or <b>Talking Pockets(sold separately) \$11.95 each</b> mounted onto display board. 3 sizes <b>Regular:</b> holds 6 Talking Pockets ( <b>Sold Separately</b> ) or 8 icons  <b>Medium:</b> holds 12 Talking Pockets ( <b>Sold Separately</b> ) or 16 icons  <b>Large:</b> holds 24 Talking Pockets ( <b>Sold Separately</b> ) or 36 icons	Fine motor skill for activation Motivated by voice output Portability Expanding communication needs Situational Communication Need for visual reinforcement
TALKING POCKETS (sold separately)		\$19.95			
		\$29.95			
		\$12.95			
TALKFRAME SIX		\$149.00	Attainment Company	Functions as communication or treatment device for supporting sequential sentence order. Unit holds six GoTalk Ones single message talkers each with large picture display and play button. Comes with the 6 <a href="#">GoTalk Ones</a> . Weighs 24 oz. Size: 16" x 5 3/4"	Motivated by voice output Symbol or picture/photo level Simple motor skills Expanding communication needs Need to combine words or phrases into sequence
7 MESSAGE TAKE N' TALK GO! BOARD		\$181.95	Enabling Devices	Record 7 messages up to 35 seconds each. Play message by removing or placing one of the 3" x 3" icons on one of the light sensitive compartments. Recessed compartments on front panel of unit can be used for placement of pictures, symbols, or objects. Seven icon holders and wall mounting hardware included. Size: 29 1/2" x 5 1/4" x 3". Requires 4 AA Batteries.	Object or symbolic level Simple motor skills Emerging interactive skills Motivated by voice output Need for visual strategies/structures Upright and Tabletop versions come in platinum color for age-appropriate appearance

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
GoTalk Pocket		\$199.00	Attainment	Contoured to fit hand. Lightweight (7 oz.) Six message keys with five levels Overlays slide in and store in a removable compartment on the back. Includes three AAA batteries. Recording time: 5 minutes.	Symbolic level Portability Fine motor Motivated by voice output Need for multiple messages
CAROUSEL COMMUNICATOR 1-LEVEL 7 MESSAGES 6-LEVEL 42 MESSAGES		\$199.95 \$222.95	Enabling Devices	7 messages per level. 37 seconds total recording time for 1-Level model, 6 seconds per panel for 6-Level model. Seven icon holders included. Size: 13" x 4". 4 AA batteries.	Symbolic level Gross motor skills Motivated by voice output Motivated by novelty device
7 MESSAGE TAKE N' TALK TABLETOP COMMUNICATORS  set of 35 colored coded icon holders		\$225.95  \$26.95	Enabling Devices	Record 7 messages on 6 levels for a total of 5 seconds each. Message is played by removing or placing one of the 2" x 2" icons.. When the level changer button is pushed, this communicator announces (your recording) the contents of each selected level. Take N' Talk may be clamped to a tabletop. 7 icon holders included. Extra icon package of 35 holders in sets of five different colors, sold separately. Size: 20"L x 7"W x 3½"H. 4 AA Batteries. .	Symbolic level Needs multiple messages in small sets Gross to fine motor skills Need exchange program Motivated by speech or voice output Available in platinum color for adolescent/adult age appropriate
TOTALLY TACTILE COMMUNICATOR		\$249.95	Enabling Devices	Outside of device contains 6 plates with different large textures for recording and playing back messages. Each activation site has six levels for a total of 36 messages with 7 seconds per message. A large textured level changer is positioned in top center. Device is mounted on a Lazy Susan to permit turning so that user can feel choices before activating a message. Has adjustable vibration (can be turned on/off) for desensitizing the user and an adjustable activation time or voice delay (1-12 seconds) to permit time to explore or feel plate before activating the message. Size: 14½"L x 14½"W x 3"H. 4 AA Batteries.	Auditory attending skills Visual impairment Gross motor skills Needs met by limited number of messages Motivated by voice output Good comprehension of spoken language

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Eight Messages Devices

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS	
TALKING POCKETS WALLET CARRIER 4 Carrier 8 Carrier		\$15.95	Augmentative Resources	Nylon wallet with clear plastic to hold Talking Pockets Voice-Overs. (Sold separately) Webbing strap and Velcro tab to hook to belt or belt loop Velcro tab for opening and closing	Fine motor skill for activation Motivated by voice output Portability Needs met by 4 to 8 messages Situational Communication

Help for completing sequential tasks Need for schedules with visual structure	
		\$12.95				
		\$18.95				
CHEAP TALK SWITCH MODULE 8 Jacks		\$137.95	Enabling Devices	External switches activate either one of 8 messages. Easy recording of up to 37.5- second messages. Size: 3 1/2" x 6" x 2 1/4". Requires 4 AA Batteries. Switches not included	Symbolic level Can activate switch Needs met by 8 messages Motivated by language or voice output Attends to linguistic output Participation in group activities	

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
VOICE PAL SERIES  VOICEPAL 8  VOICEPAL 8K		\$189.00  \$219.00	Adaptivation	<p><b>VOICE PAL 8:</b> Up to eight 11-second natural voice messages. Activated by taction pads or other external switches. Retains messages when batteries run out. Options for Delayed Activation or Repeating Messages. Size: 5 3/4" x 3 3/4" x 1 1/4". 4 AAA batteries.</p> <p><b>VOICE PAL 8K:</b> Similar to Voice Pal 8, with built-in keypad. May also be accessed by taction pads or external switches.</p>	Need for 10 or less messages Need for use of objects Need to associate object and verbal output Need for multiple users during activity Expanding communication needs
CHEAP TALK 8 DIRECT DIRECT w/overlay options DIRECT, JACKS & SAY IT-PLAY IT DIRECT, JACKS & SAY IT-PLAY IT w/overlay Option  ON-THE-GO  2-LEVELS DIRECT & JACKS w/overlay option		\$199.95 \$205.95 \$204.95 \$219.95 \$209.95 \$239.95	Enabling Devices	<p>Digitized speech. Eight 2" square message spaces. Separate icons inserted for each message. 37.5 seconds per space on 1-level model; 18 seconds per message with 2-level model. Suction cup feet. Size: 12 1/2" x 8" x 3". Requires 4 AA batteries.</p> <p><b>JACKS:</b> Uses switches in jacks that correspond to each plate.</p> <p><b>SAY IT PLAY IT:</b> Connect to external toys or appliances.</p> <p><b>ON THE GO:</b> Comes with sturdy handle and adjustable strap.</p> <p><b>OVERLAY OPTION:</b> Permits inserting premade overlay into device.</p> <p><b>2-LEVEL</b> 8 messages on each level with 18 seconds for each message</p>	Needs met by 8 or 16 messages Motivated by voice output Attends to linguistic output Direct select in 2" x 2" area Can use switches
4/8 OBJECT COMMUNICATOR		\$259.95	Enabling Devices	<p>6 levels of 8 messages, 5 seconds recording time per compartment. Single switch scanning. Small objects represent messages in enclosed compartments. Objects lit by 6 lights during scanning. Scan 4 or 8 compartments. Size: 17" x 12". Compartments: 3 1/4" x 3 1/4" x 2 1/4". 4 AA batteries.</p>	Object symbol level Switch activation and scanning abilities Needs met by 8 – 48 messages Motivated by voice output

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
CHEAP TALK 6 LEVEL COMMUNICATOR DIRECT w/overlay DIRECT & JACKS w/overlay ADVANCED 6-LEVEL ADVANCED 6-LEVEL W/JACKS		\$279.95 \$305.95  \$299.95 \$305.95	Enabling Devices	6 levels of 8 five-second messages (2" sq.) per level (48 total). Slide message display behind switch plate face. Size: 12 1/2" x 8" x 3". Requires 4 AA Batteries. JACKS: 4 external switches <b>OVERLAY OPTION:</b> Permits inserting premade overlay into device rather than individual icons <b>ADVANCED:</b> One message square dedicated to changing levels <b>ON-THE-GO</b> with handle and strap	Symbolic level Need for multiple messages Accurate direct selection Need for use in many settings with different overlays and ease of programming
6-LEVEL ON-THE-GO  6-LEVEL ON GOOSENECK		\$289.95  \$324.95			
ADVANCED AUDITORY COMMUNICATOR		\$320.95	Enabling Devices	6-level communicator with auditory cueing. Push any of the 7 cells to hear chosen message in low volume; push cell again and it plays in an amplified volume. Up to 42 messages (7 messages on each of 6 levels). 300 seconds of total record time Bottom right cell is the level announcing message Icons not included. 12"W x 2 3/4"H x 8"D 4 AA Batteries. Each icon individually changeable.	Symbolic level Need for multiple messages Accurate direct selection Need for use in many settings with different overlays and ease of programming Change levels and overlays independently
HAWK II  HAWK III		\$329.00 \$439.00	Adamlab	Digitized speech. devices <b>HAWK II:</b> 2 levels of 8 selection areas, 7.5 seconds of speech per 2"x2" selection area. Single button recording. 8 jacks for switch accessibility. Keyguard included. <b>HAWK III:</b> 3 levels of 8 selection areas, 7.5 seconds per 2"x2" selection area on first two levels, level three up to 15 seconds per selection area. 8 jacks for switch accessibility. Keyguard included. Volume control Ni-cad battery with charger 13 3/4"L x 10 1/2"W x 2"H.	Symbolic level Direct select Need for multiple messages Need for use in many settings with different overlays and ease in programming Average fine motor skills

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
TALK 8 WITH LEVELS  WITH VIBRATION  WITH ENVIRONMENTAL CONTROL		\$359.95  \$379.95  \$403.95	Enabling Devices	12 levels of 8 messages. 600 seconds total recording time. Recordable level announcer. Double jacks for inverse, automatic, two switch, or step scanning. Auditory scanning/cueing. Slide-in overlay track. Light touch membrane switch. 25 degree angle. Carrying strap. Optional vibrating feedback. Size: 11 1/2"L x 6 1/2"W x 3"H. 4 AA batteries.  ECU controls up to 4 remote household electronic devices and permits recording messages for each, e.g. "lamp on", "lamp off". Complete with four X-10 wall receivers. X-10 Receivers require AC wall outlet.	Symbolic level Gross motor skills Meets expanding communication needs Need for portability Need for vibrating feedback Need for portability Need for environmental control
TECH/TALK  6 Levels  8 Levels  12 Levels		\$435 - \$795  \$490-\$850  \$710-\$1168	AMDI	Impact resistant plastic, lightweight and portable. Digital speech. jack for external speakers. Long battery life, 4 AA batteries. Optional 4 output jacks for external connections to control toys./appliances, etc. & 4 input jacks for switch access & rechargeable battery & extended memory	Symbolic level Motor skills ranging from simple to fine Meets expanding communication needs Need for portability Need for auditory prompt
MINI MESSAGE MATE 8/60		\$459.00	Words+	Analog recording. Up to 8 message spaces each 1.25" sq. 8 jacks for single switches. Membrane overlay pocket. Nylon case. 60 seconds total recording time. Rechargeable batteries – approximately 5000 messages from a single charge. Size: 7.25"x 3"x 1.25". 1 lb.	Symbolic level Needs met by short messages Needs satisfied by up to 8 messages Good motor skills Direct select or single switch skills Can choose correct message Need for quick access and portability
LIGHTHAWK		\$629.00	Adamlab	Digitized speech. 8 large 2" x 2" squares surrounded by 8 LEDs. 3 levels of 8 selection areas. 7.5 seconds of speech on first 2 levels, level 3 up to 15 seconds per selection area. Single switch and 2-switch scanning. Ni-Cad batteries with charger.	Symbolic level Fine motor skills Motivated by voice output Direct select or single/multiple switch use

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
SMART/TALK		\$775.00	AMDi	Utilizes <i>Smart Overlay System</i> : Punch a hole in the designated area, using standard hole punch. Change overlay and level is changed accordingly. Device senses hole pattern on overlay. <i>Interchangeable Flash Card</i> holds 6 levels of recorded voice with up to 30 minutes of recording time. Digitized speech with water resistant membrane with 6 levels of 8 messages with cell size of 2.75" sq. Carrying handle. 4 output jacks. Rear mounted volume. External speaker and record jacks. Removable top grid. Rechargeable battery.	Symbolic functioning Need moderate number of messages Can use for specialty vocabulary in particular environments (sports, movies, shopping) Spontaneous interactive communicator Need for portability Need for visual support
TECH/TALK WITH ENVIRONMENTAL CONTROL		\$875.00- \$1435	AMDi	6 available levels, the first level designated for Environmental Control functions. The additional 5 levels are for communication. 8 messages of 4.5 seconds per level with picture size of 2.75" Membrane panel 32 electrical devices and/or light fixtures can be controlled in one level Rechargeable battery is included Four programmable power outlets included Shoulder strap included Optional 8 input jacks for switch access (Communication and Environmental Controls) Optional message length of up to 9.0 seconds per minute Optional built-in INFRARED for various TV controls \$200.00	Symbolic functioning Need moderate number of messages Can use for specialty vocabulary in particular environments (sports, movies, shopping) Spontaneous interactive communicator Need for portability Need for environmental control
TECH/SCAN8		\$1,020	AMDi	Direct select (membrane panel) or scanning device with 8 cells & 8 levels (64 messages) Standard message of 4.5 seconds with total recording time 9.6 minutes LED prompt lights embedded in grid no need to punch holes to see lights Linear or step scanning with 2 switch capability 3 different scan speeds: slow - 4.5 seconds, medium - 2.25 seconds and fast - 1 second Beeping tone available to augment visual cues Unit enters sleep mode when inactive for 5 sweeps and awakens with touch of user switch External earphone jack Low battery indicator light 13.5" x 8" x 3" message cell 2.75" 2.5 lbs Options: Rechargeable batteries Extended per message length of 9.0 seconds	Symbolic functioning Need moderate number of messages Can use for specialty vocabulary in particular environments (sports, movies, shopping) Spontaneous interactive communicator Need for portability Need for visual scanning Need for visual support Motivated by voice output

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Nine to Fifteen Messages Devices

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
PORTABLE CLEAR COMMUNICATION DEVICE WITH OPTIONAL VOICE OUTPUT		\$14.95	Augmentative Resources	Clear vinyl carrying case with Velcro closure and webbing handle. Inner, removable thick black plastic board with loop Velcro strips on both sides. Use with icons or <b>Talking Pockets(sold separately) \$11.95 each</b> mounted onto display board. 3 sizes <b>Regular:</b> holds 6 Talking Pockets ( <b>Sold Separately</b> ) or 8 icons  <b>Medium:</b> holds 12 Talking Pockets ( <b>Sold Separately</b> ) or 16 icons  <b>Large:</b> holds 24 Talking Pockets ( <b>Sold Separately</b> ) or 36 icons	Fine motor skill for activation Motivated by voice output Portability Expanding communication needs Situational Communication Need for visual reinforcement
		\$19.95			
		\$29.95			
TALKING POCKETS (sold separately)		\$12.95			
LISTEN TO ME		\$79.00	DTK Enterprises, Inc.	12 messages (1" sq.) with 10 seconds each. Clear sleeve on top, auto off, volume control, audio input from an external source. Carrying case with both hand and shoulder straps that can be independently attached directly to the top of the unit. High impact plastic. Good sound. 7"L x 5"W x 1"D, 8.1 Oz. Requires 3 AA batteries, AC Adapter available.	Symbolic level Needs met by 12 messages Motor skills to target 1" space Need for portability Meet expanding communication needs
SPINNING COMMUNICATOR		\$158.95	Enabling Devices	12 sectors with 18 seconds of recording time each. Device turns with very slight touch. Icon holders screwed into place. Size: 12" diameter. Icon Opening: 2 1/4" x 2" x 1 1/2". 4 AAA batteries.	Symbolic level Limited range of motion Motivated by voice output Needs met by 12 messages

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
GOTALK9+		\$199.00	Attainment	Nine 1 3/4" x 2 1/4" message buttons with 5 recording levels. Three "core messages" at top of device remain constant when levels change. 9 minutes of total recording time. Volume control. Size: 9" x 12" x 1 1/8" Weight 23 oz. 2 AA batteries. Built-in handle, key guard, and overlay storage. Carry Stand available separately. GoTalk Overlay Software available separately.	Symbolic level Needs multiple messages in small sets Fine motor skills Need for portability
HAWK		\$250.00	Adamlab	Digitized speech. <b>HAWK:</b> 9 selection areas with 6.5 seconds each. Single button recording. 3"x 3" matrix.	Symbolic level Direct select Need for nine messages Need for use in many settings with different overlays and ease in programming Average fine motor skills
HIP TALK 12 W/LEVELS		\$269.95	Enabling Devices	Digitized speech device with 11 messages of 5 seconds per level. 5 levels with 12 keys (11 message keys + level changer) waterproof Neoprene carrying bag. Device contoured for waist. Adjustable waist strap to fit most. Sleep mode to save battery life. Volume control. Auditory cueing Size: 7"L x 3"W x 3 1/2"H. 4 AA batteries. Set of 5 replacement waist packs available.	Symbolic level Needs met by 11 to 55 messages Good fine motor skills Need portability especially for ambulatory Need device that does not call attention to itself Backup for use with physical activities Expanding communication needs
PHRASE MAKER COMMUNICATOR		\$435.95	Enabling Devices	Allows combination of 15 pre-recorded words or short phrases of 3 seconds in length to create sentences. "Sentence key" re-plays the selected words/phrases as complete sentence. 7 levels. Device can be used like standard 7-level communicator. Carrying handle. Back of device opens to store overlays. Directions inside compartment. Size 12 1/4"L x 10 3/4"W x 3 3/4" H. 4 AA batteries.	Symbolic level Ability to sequence symbols to formulate a message Expanding communication abilities Fine motor skills Need for portability

ATTAINMENT TALKER 24		\$69.00	Attainment	24-message device with 10 seconds of recording time for each message. Clear plastic pocket holds and protects communication overlays. 3/4-inch active area. Can be held with 2 hands and activated thumbs, or use on tabletop. Nonskid pads keep device from sliding. Size: 12 1/4" x 2 1/4" x 1/2". Weight: 6.6 oz. 2 AA batteries (included).	Symbol level Good fine motor skills Need for portability Needs met by a limited/concentrated set of messages
GOTALK 20+		\$249.00	Attainment	Twenty 1" square message buttons with 5 levels for total of 100 messages and 5 "core messages" at top of device which remain constant when levels change. 15 minutes of total recording time. Volume control. 9" x 12" x 1 1/8", 2 AA batteries. built-in handle, key guard, and overlay storage. Carry Stand available separately. GoTalk Overlay Software available separately.	Symbolic level Needs multiple messages in small sets Fine motor skills Need for portability
32-MESSAGE COMMUNICATOR WITH LEVELS		\$296.95	Enabling Devices	6 levels of 32 messages each. 192 3-second messages. Frame allows for easy changing of overlays. Adjustable legs for tilting the unit. Lightweight, portable, carrying handle. Size: 16"L x 9"W x 3"H. 4 AA batteries. Advanced 31 Message: Level changer on the icon grid, recordable level announcements, auditory cueing	Symbolic level Fine motor skills Expanding communicative needs Need for portability
ADVANCED 31 MESSAGE COMMUNICATOR 6-LEVELS		\$319.95			
MICROVOICE 6/24		\$429.00	Frame Technologies	6 Levels. 24 messages per level. 16 minutes speech storage with message length of 6.25 seconds. Comes with 6 slide-in overlays. Automatic level changing. Size: 3.5" x 5.5", 12 oz. Requires 4 AAA batteries.	Ambulatory/need for portability Symbolic level Good fine motor Good vision
PHRASE MAKER COMMUNICATOR		\$435.95	Enabling Devices	Allows combination of 15 pre-recorded words or short phrases of 3 seconds in length to create sentences. "Sentence key" re-plays the selected words/phrases as complete sentence. 7 levels. Device can be used like standard 7-level communicator. Carrying handle. Back of device opens to store overlays. Directions inside compartment. Size 12 1/4"L x 10 3/4"W x 3 3/4" H. 4 AA batteries.	Symbolic level Ability to sequence symbols to formulate a message Expanding communication abilities Fine motor skills Need for portability

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
VOICE-IN-A-BOX 6/16 VOICE-IN-A-BOX 6/36		\$449.00 \$545.00	Frame Technologies	Digitized speech Six levels, 16 messages per level. 16 minutes speech storage, with message length of 6.75 seconds. Rugged plastic case with built-in handle and 16-hole lexan key guard. 2" square message cell. Size: 15 1/4" x 11", 3 lbs. 4 AA batteries. Digitized speech: Six color-coded levels, 36 messages per level. 16 minutes voice storage, with message length of 4.2 seconds. Plastic case with built-in carrying handle and 36-hole lexan key guard.	Symbolic level Average to good fine motor control Need for multiple messages
TURN-N'-TALK		\$449.00	Frame Technologies	Utilizes automatic optical level changing: when page turned, level is changed. 6 levels with 2 pages of 24 messages each (288 messages). 16 minutes recording time. 1 1/4" message cell. Recessed carrying handle. Size: 11 1/2" x 9 1/2" 4 1/2" to 2" slant, 3 lbs. 4 oz.	Symbolic level Need for multiple messages Good categorization or navigation skills Good vision Portability Spontaneous, interactive communicator
TECH/SPEAK TECH/SPEAK ECU		\$490.00 to \$1408.00 \$1095.00 to \$1610.00	AMDi	<b>Tech/Speak</b> ABS injection molded case. water resistant pressure sensitive membrane panel. Digitized speech. 32 messages size 1.25" sq. Available in 2, 4, 6, 12 levels with up to 384 messages. 32 messages of 2.25 seconds up to total of 28.8 minutes. Shoulder strap included. 2 color available. 4 AA batteries. Optional rechargeable battery. Low battery indicator light. Removable top grid. External speaker and record jacks. Can use Tech/Overlay Designer to create overlays. Size: 2.5" x 6.5" x 12.5" Weight: 2 lbs. <b>Tech/Speak ECU</b> 6 levels Control for up to 32 electric devices and/or light fixtures. Optional programmable 25-w halogen light bulbs. Optional 8 input jacks for switch access. Available with infrared for TV remote.	Good motor control Need moderate number of messages Requires ease in portability Use for specialty vocabulary in particular environments (sports, movies, shopping, etc.)  Tech/Speak ECU need for environmental control

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
CHATBOX – 1  CHATBOX – DX		\$495.00  \$645.00	Saltillo Corporation	Digitized speech: 10 minutes. 16 spaces. Utilizes Minspeak (combines multi-meaning icons to represent words, phrases or sentences). Icon prediction, direct select and row/column or linear scanning. Holds up to 4 overlays. <b>DX</b> model offers same as above with the addition of auditory scanning, 4 remote switch inputs and 4 or 16 active areas. Rechargeable battery. Size: 5.75"x 7.5". Weight 1.5 lb.	Requires extensive message formulation Need for numerous messages Compact back-up to larger system Primary device until use more complex system Fine motor skills
BLACKHAWK		\$529.00	Adamlab	Digitized speech. 3.75 seconds of recording time per area. 16 messages (1" squares) on 4 different levels for 64 messages. Each level has 4 keys for selecting other levels. Plastic cover opens to insert overlays.. Size: 9.5"x 6"x 1.75", 1.5 lb.	Symbolic level Direct select or single/multiple switch use. Requires extensive messages Motivated by voice output Fine motor for direct Gross motor for switch Need for portability
SMART/SPEAK  SMART/SPEAK BUNDLE KIT		\$875.00  \$1160.00	AMDi	Smart/Speak Utilizes <i>Smart Overlay System</i> : Punch a hole in the designated area, using standard hole punch. Change overlay and level is changed accordingly. Device senses hole pattern on overlay. <i>Interchangeable Flash Card</i> holds 6 levels of recorded voice with up to 30 minutes of recording time. Digitized speech with water resistant membrane with 6 levels of 32 messages with cell size of 1.25" sq. Rechargeable battery. Removable top grid. Carrying handle. Available 2 colors. Low battery indicator light. External speaker and record jacks. <b>Bundle:</b> device bundled with Overlay Designer Pro software and a carrying case	Symbolic functioning Need moderate number of messages Can use for specialty vocabulary in particular environments (sports, movies, shopping) Spontaneous interactive communicator Need for portability

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
TECH/SCAN32 SERIES		\$1,020.00 to \$1,620.00	AMDi	<p>The Tech/Scan Series are light weight, multi level devices (2, 4, and 6 levels available) that combine standard direct selection with scanning. 32 messages per level on light touch membrane panel. For scanning, LED prompt lights are embedded in the grid; beep available to augment visual cues. Linear, step and Row/Column scanning (2-switch scanning capability with step &amp; row/column scanning. Three different scan speeds: 4.5 seconds, 2.25 seconds, and 1 second. Large, labeled control button on back panel. External earphone jack. Standard message length of 2.25 seconds; some devices have extended time available. Options affecting price: number of levels, extended recording time (4.5 sec per msg vs. 2.25), auditory prompts, rechargeable batteries. Weight 2.5 lbs.</p>	

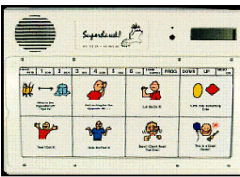

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Progressive Communication Devices

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
LINGO		\$186.00	AbleNet	Configurable for 2, 4, or 8 messages (with optional Symbol Holder 3-pack). 7 messages with up to 25 seconds; 1 message with 60 seconds. One level. ½” symbols may be used with Symbol Holder. Volume control and volume lockout. Wearable; includes belt clip. Accessory pack has shoulder and smaller straps. Optional keyguards/symbol holders. Headphone jack for using device as a memory aid. Rechargeable battery (estimated one week between charges).	Symbolic level Needs met by 2 to 8 messages Good fine motor skills Need for portability Need for device that does not call attention to itself No need for extensive message formulation
COMMUNICATION BUILDER  4-LEVEL COMMUNICATION BUILDER  7-LEVEL COMMUNICATION BUILDER		\$224.95  \$305.95  \$325.95	Enabling Devices	1-LEVEL: 5 frame options - Frame options: 1, 2, 4, 8, or 16. 300 seconds total recording time. Built-in handle. 4-LEVEL: Same frame options as 1-Level. 600 seconds total recording time, maximum message length 4 seconds. 7 LEVEL: Same frame options as others. Total record time of 300 seconds. Up to 112 messages. Blue with teddy bear or black. On-the-Go model has carrying strap. All Models: Size: 12 ½”L x 9 ¼” W x 4”H. Frame size 8.5”x 7”. 4 AA batteries.	Symbolic level Gross to fine motor skills Expanding communicative needs Need for portability Need for age-appropriate appearance (1-LEVEL and 7-LEVEL)
HIP TALK PLUS		\$249.95	Enabling Devices	300 seconds of digitized speech. Configure device for 3, 6, or 12 messages using 3 interchangeable frames. Nylon zippered fanny pack to carry at waist or across body. Auditory cuing. Volume control. Includes frames and 3 blank paper overlays, Size: 7”L x 3”W x 3½”H. 4 AA Batteries.	Symbolic level Needs met by 3 to 12 messages Good fine motor skills Need portability especially for ambulatory Need device that does not call attention to itself Backup for use with physical activities Expanding communication needs

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
PEN FRIEND PORTABLE COMMUNICATION DEVICE  ADDITIONAL LABEL PACKS (A & B)		\$249.00  \$49.95/pack	Augmentative Resources	1.9 ounce voice output pen-like device with re-recordable coded stickers. 70 hours of recording time. . Record/rerecord by pressing record button and holding , touch pen to sticker listen for beep, record message and release. Touch tip of pen to hear recorded message. can read recorded sticker message through clear lightweight plastic covers Can make back-up recordings on computer & download MP3, book & music files. 6 1/4"H with a 3 1/2" circumference, Includes: Pen Friend, 127 mixed size (91 circles 7/16", 18 circles 13/16", 18 sq.1 1/8") adhesive backed recordable labels & matching number of repositionable sticker mounting labels, USB Cable, neck lanyard, 2 AAA batteries. Additional label packs A & B Each include: A total of 381 mixed size Labels (273 circles 7/16", 54 circles 1 3/16", 54 squares 1 1/8") Must have different packs to be compatible with embedded coding (can use one A and one B but not two of A and two of B)	Good fine motor skills Portability Few or multiple messages Support for many learning activities Symbolic representation Situational communication Literacy learning Prompts Cueing
CARDINAL		\$279.00	Unlimiter Saltillo in USA	1, 2, 4, and 8 location overlays. 3 Levels 8 minutes recording time Weight: 13.5 oz. Size 7.6" x 5.25" x .9" Direct select digitized recording. 2 auxiliary input jacks. 2 AA Batteries	Beginning communicator Limited number of messages Need for portability Supplement more complex system
LAPTOP COMMUNICATOR		\$305.95	Enabling Devices	5 frame options: 1, 2, 4, 8, or 16 messages. 7 levels, up to 112 messages. 300 seconds total recording time. Size: 9 1/2" x 7 1/2" x 2 1/4". Frame size: 8 1/2" x 7". 4 AA Batteries	Symbolic level Gross to fine motor skills Expanding communicative needs Need for portability
SUPERTALKER PROGRESSIVE COMMUNICATOR		\$349.00	Ablenet	16 min. record time with variable message lengths 4 different grid formats for 1, 2, 4 & 8 keys with matching keyguards. Built-in keyguard storage. Eight levels. Step-ahead jack for single switch sequential message playback. Eight jacks for single-switch access to specific location. Volume control with lockout feature 12" x 8.6" x 1.75" Requires 4 AA batteries Optional travel strap	Beginning communicator with limited symbolic skills Simple motor skills Direct select or need for single switch access Need for limited messages Need for flexibility as part of future plans Requires flexibility for use in different environments Emerging interactive skills

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
SCENE COMMUNICATION BUILDER		\$395.95	Enabling Devices	Includes 7 overlay scenes in color. Scenes include Playground, Classroom, Apartment, Pet Shop, Therapy Room, Birthday Party, and Grocery Store. Comes with 5 clear plastic snap-in grid frames of 1, 2, 4, 8, 16 windows which allow the user to gradually select more detailed sections of the scenes. 300 seconds of recording time with 7 levels. Adjustable feet for appropriate angle selection. Has a built-in compartment to store overlays. Handle for portability. Size: 14¾"W x 6½"H x 12½"D. Requires 4 AA Batteries.	Needs met by 1 to 16 messages Gross to fine motor skills Need for portability Pre-graphic symbol level Aided by visual scene support Motivated by voice output
CHOICE 4 COMMUNICATOR HEADPHONES		\$399.95 \$14.95	Enabling Devices	1, 2, 3, or 4 messages 300 seconds recording time 12 levels Change number of messages by pressing two cells and covering with black icon covers Direct select, or auditory and visual scanning Adjustable scan speed, 2, 6 or 9 second Can chose: speaker only, headphones only, or speaker and headphones simultaneously.  Size: 8"L x 15½"W x 3"H  Requires 4 D Batteries  Headphones optional	Symbolic level: object to graphic Gross to fine motor skills Limited number of messages Expanding communicative needs Need for auditory prompting Need for visual supports Need for scanning visual or auditory

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
VOICEPAL LEVELS		\$499.00	Adaptivation	Four levels Can configure to 2, 3, 5 or 10 messages per level. Activated by built-in keypad, taction pads, or external switches. Relay jack for controlling external devices. May be used for sequential or randomized messaging. Visual or auditory scanning. Optional external LEDs or vibrating motor. Total recording time of 17 ½ minutes. Size: 3.75" x 6" x 1.8". Requires 4 AA batteries. Delayed activation 0 to 2 secs.	Needs met by 5 or 10 messages Direct select or single switch skills Understands linguistic output May need tactile feedback May need concrete cues or symbols Motivated by voice output May need auditory and/or visual scanning Fine motor for direct Gross motor for switch
MESSAGE MATE 20/75 20/150 40/150 40/300		\$689.00 \$919.00 \$1,090.00 \$1,320.00	Words+	<b>MM20:</b> 20/75 has 75 seconds of memory <b>20/150</b> has 150 seconds of memory Weight: 1¾ lbs Size: 11.75"x 3"x 1.25" One level, configure to 20 5, 2, 1 message spaces. <b>MM/40:</b> <b>40/150</b> 2.50 minutes of memory (1 level) <b>40/300</b> 5 minutes of memory (Multi levels) <b>All Models:</b> Membrane panel. Clear plastic pocket for overlays. Configure number of messages. 1/2 switch scanning & adjustable scan rate. Auditory scanning.. Sleep mode. AC charger. Keys with adjustable acceptance time. Volume control.	Direct select or scanning abilities Motivated by voice output Does not require extensive message formulation Fine motor for direct activation Gross motor for switch activation Need for durability
TALARA-32		\$850.00	Zygo	Digitized speech with 2 to 32 messages. 4 levels (all levels must have same number of messages). 45 minutes record time, no limit per message. Buttons at top of device allow user to change volume & levels. Scanning. Hinged overlay retainer for ease in changing overlays. Fold down handle. Keyguards & bag extra. Wedge shape. Keyboard 1.5" x 7.75" 1.75 lbs. 4 AA batteries.	Symbolic level Needs met by 128 messages or less Need for portability Need for greater user control over volume, level Fine motor for some keyboard configurations Gross motor for some keyboard configurations and switch access
SUPERHAWK SIX SUPERHAWK TWELVE SUPERHAWK PLUS		\$869.00 \$1069.00 \$1339.00	Adamlab	Digitized speech 6, 12, or 72 plus minutes. Up to 72 cells, grid dimensions from 6x12 to 1x2. Up to 72 pages, limited by memory. 72 location keyguard included. 4 output jacks to control other devices. 4 inputs jacks. Auditory scan. LCD for level location & programming. Size: 10.5"x 13.75"x 2", 3 lb. AC charger.	Direct select or scan Motivated by voice output Requires extensive numbers of messages Need auditory scanning Fine motor for direct Gross motor for switch

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
CHATBOX 40 CHATBOX 40 PLUS CHATBOX 40-XT CHATBOX 40-XT PLUS		\$895.00 \$1095.00 \$1195.00 \$1395.00	Saltillo	<b>ChatBox 40</b> Static display device with LCD panel with 30 minutes digitized speech use across levels & cells as needed. 40 Keys - .9" by .9" or 10 Keys - 1.9" by 1.9." Ten levels of messages (change with up/down arrows). LED's on each key with a stored message provide user with visual cue. Digitized messages can be programmed to include text that appears in 2-line LCD Display. Use feature to assemble a message using multiple keys (e.g., "I want ... to eat"). The message can then be spoken as a single phrase by selecting the Speak Message. Numerous Scanning Options. Time variable .1-10 secs. <b>ChatBox 40-XT</b> adds basic voice synthesis capability. User can create their own messages on the LCD display using either pre-stored messages or typing on an alphabet keyboard. Li-Ion rechargeable battery with AC adapter. Size 12" x 8.3" 2.25 lbs	Need for visual feedback (lights and text) Need for portability Need for limited to numerous messages Spontaneous interactive communicator Support emerging message formulation  ChatBox 40-XT Requires literacy skills Fine motor skills Supports generative communication and message formulation.
BOARDMAKER ACTIVITY PAD		\$899.00	Mayer Johnson	Provides interactive activities. Each activity can have up to 32 recordable buttons. Freeform layouts possible. Up to four minutes of total recording time per SmartPocket. Activities are created in Boardmaker (sample activities and templates are included), and 2 activities fit on a single letter sized sheet of paper.	Symbolic skills Need to generalize symbol use to other situations Support for emergent literacy Support in educational and learning opportunities
SMART/128		\$985.00	AMDi	Digitized Speech with 6 levels of 128 messages per level. 2.25 seconds per message. Optional key guards 4,8,16,32,128. Transparent top grid can be removed. With grid, the Smart/128 is a standard static 128 location device. Without grid, can be used as a pictorial communication device. Utilizes <i>Smart Overlay System</i> : Punch hole in the designated area, using standard hole punch. Change overlay changes level accordingly. Device senses hole pattern. <i>Interchangeable Flash Card</i> holds 6 levels of recorded voice with up to 30 minutes of record time.	Symbolic functioning Need moderate to extensive number of messages Fine motor skills Can use for specialty vocabulary in particular environments (sports, movies, shopping) Need for visual scene displays

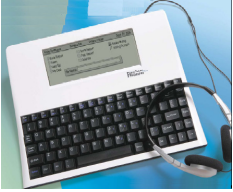

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
BOARDSPEAKER T1200  SPANISH		currently not available – new version in 2010	Afforda Speech	Unlimited recording Built-in touch screen Hold up to 40 cards Screen accommodates 1 to 54 cells per page Uses Boardmaker to create picture cards that must be printed using an EPSON PictureMate photo printer. Messages are programmed on the Boardspeaker website and then a barcode is printed on back of the card which contains spoken messages. Boardmaker reads the bar code. Requires 4" x 6" BoardSpeaker Cardstock for picture cards Can be used with objects that have barcode attached. ( no special paper required) DECTalk Rechargeable batteries	Symbolic level: object to graphic Fine motor skills Limited number to large number of messages Expanding communicative needs Portability Need for changing overlays independently
EASYTALK 8 MINUTES 16 MINUTES 24 MINUTES 32 MINUTES		\$999.00 \$1099.00 \$1199.00 \$1299.00	Great Talking Box	Digitized voice output. 6 keyboard layouts: 4x10 (40), 4x5(20), 2x5(10), 2x2(4), 1x2(2), and 1x1(1) messages. No limit on time per message up to the overall time on the device. 8 possible levels. Four scanning options. 1 output jack for external speaker; 2 input jacks for external switches. Automatic call button when any key pressed for >5 seconds. Size: 12" x 4" x 1.25", 2.1 lbs. Rechargeable battery	Direct select or scanning abilities Motivated by voice output Does not require extensive message formulation Fine motor for direct Gross motor for switch
DIGICOM 2000		\$1499.00	Great Talking Box	Liquid crystal display w/2 rows, 16 characters each. Touch Panel: 9.12" x 4.10" 34 minutes recording time. Can transfer messages/functions between keys without re-recording. Key activation times can be changed to accommodate user. Sequence prediction to aid in sequencing. Save an unlimited number of messages on floppy disk with Digicom 2000 disk drive (extra). Display provides instructions for programming. Visual & verbal cues for scanning. 18 overlays, some pre-printed and some blank. Vary in size from 1x 2 (2 keys) to 4x 12 (48 keys). Size: 10.75" x 7.74" x 1.5" 2.7 lbs. Rechargeable battery.	Symbolic level Expanding communicative needs Need for portability Fine motor skills Need for assistance in sequencing messages

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Dynamic Display Devices

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
MV-1000		\$398.00	Digital Voice Technologies	MV-1000 software installed on <a href="#">Palm Tungsten E2 Handheld</a> . Volume control, voice selection and display options. Touch screen, dynamic display. Four symbols on each screen. Navigate using pictures linking to other symbols or arrows to move to additional pictures or back to previous pages. (user/partner can move pictures so most frequently used are at top of list) Comes with 400 pictures (drawings and photos). Others must be added by company at additional cost. Hotsync with computer for backup.	Portability Fine motor Picture or symbol level Need for many messages Ability to negotiate multiple levels Fine motor skills Need for handheld communicator Desire for a more stylish or professional appearance
HAND HELD VOICE		\$695.00	Ability Research	Dynamic Display Touch screen, black and white LCD. 2400 Mayer Johnson Picture Communication Symbols. Quickly change recordings with "hot swap cards." 8 minutes of recording. Option of purchasing 16 minute expansion cards, carry case, backup cable and boardlink software. 1.5 lbs. AA batteries.	Symbolic level Fine motor skills Expanding communicative needs Need for portability Good visual skills for LCD screen
MINI-AUGGIE		\$1149.00	RJ Cooper	HP 2495 PocketPC utilizes Point To Pictures - Mobile (PTP-Mobile) software and is touch-sensitive. The Mayer-Johnson PCS library included on SD card, and the Dell has built-in voice recording. Unlimited number of 'pages' with up to 25 pictures per page can be stored, jumped to, and retrieved. Weighs 1.2 pounds. Full day battery life. Full-screen display of the selected icon, which greatly enhances the 'speaking' power of the device. Black rugged case. scanning capability permits program to be operated by touching the screen (anywhere) at specific times, or with optional Cordless Mini-Auggie Switch Interface, which then can do Auto- and Step-Scanning (even auditorially).	Picture or symbol level Need for many messages Ability to negotiate multiple levels Fine motor skills or scanning skills Need for handheld or portable communicator Desire for a more stylish or professional appearance

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
CYRANO COMMUNICATOR		\$1399.00	One Write Company	Based on Pidion BM150R with built-in 1.3 megapixel camera. 3 1/2" full color screen with touch sensitivity. 520 Mhz processor. Over 500mb of on-board memory, with 1GB storage card. Uses a picture-based interface and/or text-to-speech (Cyrano Shorthand™) and synthesized speech (4 voices: male & female American & British). Designed to be easily programmed by user or caregiver, with lay out and strategy developed by therapist. Can access other programs on board, such as Microsoft software. Clickpix: allows to take picture with camera & use entire screen with hot spots for communication or to link to other pages. Text-to-Speech with full-screen keyboard is also possible. Bluetooth and Wi-Fi networks, GPS receiver & FM radio transmitter. Play movies & music. Many accessories available to add convenience and durability. Rechargeable battery with 8-hour life; AC adapter included.	Picture or symbol level Need for many messages Ability to negotiate multiple levels Fine motor skills Spelling ability (for text-to-speech) Need for handheld communicator Desire for a more stylish or professional appearance Need or desire for being able to add new photos/messages quickly, without extensive programming Good visual skills

POLYANA-JT WITH PERSONA		\$1495.00	ZYGO	Windows CE mini-laptop running the Persona communication program with speed enhancing techniques such as dialog scripts, phrase bank, word prediction and completion, and abbreviation expansion. Use for communication, browsing the web, sending and receiving e-mail, playing games. 7" LCD screen, integrated speakers, mouse touch pad, two USB ports, built-in modem. Direct selection using computer keyboard, or scanning access with Persona's onscreen keyboard. Software uses Neo speech synthesizer. Size: 8.9" x 6.5" x 1.4". Weight: 1.8 lbs. Rechargeable battery lasts 4 hours.	Either fine motor skills or need for switch scanning Spelling ability Need for portability Spontaneous Novel Utterance Generation Desire or need to access online content Good visual skills

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Devices for Those with Visual Impairment

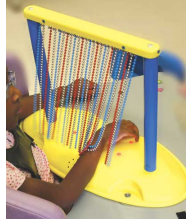

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
AUDITORY COMMUNICATOR		\$153.95	Enabling Devices	Scans through pre-recorded messages at a lowered volume; switch reactivated to select message, which is played at an amplified volume. 16-level unit; 300 seconds of total recording time with 18 seconds per level. Jack for an external switch (not included). Size: 6 ½"L x 4"W x 2 ½"H (lower front wedge). Requires 4 AA batteries.	Auditory attending skills Visual impairment Gross motor skills Needs met by limited number of messages Motivated by and good comprehension of voice output
SPEAK A NEED		\$184.95	Enabling Devices	Five levels with 10 Needs messages and 10 Response messages per level for total of 50 messages/commands/requests. On each level, the user presses the red round plate switch on top of the unit until the desired need is spoken, then user presses the yellow round pate switch to speak the response message. Jack for external switch. Size: 4"H x 8½"W x 4½"D. Requires 4 AAA Batteries.	Gross motor skills for activation Motivated by voice output Portability Comprehension of spoken message Expanding communication needs Situational Communication Need for portability Need for auditory sequencing Limited range of motion
TOTALLY TACTILE COMMUNICATOR		\$249.95	Enabling Devices	Six levels of six messages for a total of 36 messages with 7 seconds per message. Around the outside are six plates with different large textures. A large textured level changer is positioned in its center. It is mounted on a Lazy Susan so the communicator can be turned for feeling all of the choices before activating a message. Comes with a very minimal vibration and has adjustable activation time (1-12 seconds) so the plates can be felt for the set time without activating the message. Size: 14 ½" x 14 ½" x 3". Requires 4 AA batteries.	Gross motor skills Able to understand textures as symbols Visually or Dual Sensory impairment Need for vibrating feedback Need for tabletop device Limited range of motion
ANNOUNCER WITH 6 LEVELS TABLE TOP ON GOOSENECK	 	\$259.95 \$279.95	Enabling Devices	Allows the user to first hear a series of words and then select one by activating the device. 5 second messages, 300 seconds of total recording time. 6 levels. Auditory cueing/scanning with playback delay of 1 to 5 seconds. Jack for external capability switch Available for tabletop use or on a 24" Gooseneck. <b>Tabletop</b> – Size: 6¼"L x 6¼"W x 3"H. Requires 4 AAA Batteries. <b>Gooseneck</b> – Size: 26"H x 6"W. Requires 4 AA Batteries.	Auditory attending skills Visual impairment Gross motor skills Needs met by limited number of messages Motivated by and good comprehension of voice output

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
SYMBOL COMMUNICATOR FOR THE BLIND		\$335.95	Enabling Devices	Designed for blindness or dual sensory impairment. 6 levels of 6 messages, 6 seconds per message. Activated by downward pressure on removable tactile symbols. Optional vibrating feedback so that those with hearing impairment can know the message has been activated. Includes 6 symbols: bathroom, something wrong, drink, I want, finished, eat. Handle and carrying strap. Size: 14"L x 10 1/2"W x 2"H. 4 AA batteries.	Symbolic level Gross motor skills Blind or Dual Sensory impaired Need for tactile symbols Need for vibrating feedback Need for portability
ILLUMINATED PICTURE FRAME COMMUNICATOR & ACCESSORY  Set of extra frame holders		\$340.95  \$19.95	Enabling Devices	Push any of the 4 pictures to activate pre-recorded message and the photo will be brightly illuminated. Uses 4" x 5" picture card holders. Holds up to 8 photographs using front and back. Work in fields of one, two, three, or four. Direct select, single switch scanning, or auditory cueing. Adjustable scan speed of 2, 6, 9 seconds. Three broadcast options: speaker only, headphones only, or speaker and headphones. 12 levels with 300 seconds of recording time, 5 seconds per message Size: 12 1/2"D x 19"W x 6"H. Requires 4 D Batteries.	Symbolic level Gross motor skills Visual acuity or processing aided by background illumination Needs met by multiple messages
VISUALLY IMPAIRED COMMUNICATORS SMALL MEDIUM LARGE		\$345.95 \$385.95 \$395.95	Enabling Devices	Two dimmable fluorescent tubes providing intensive background illumination. For use with clear or transparent symbols.  <b>SMALL:</b> 48 6-second messages on 6 levels. Size: 15"x9 3/4"x5 3/4" wedge. 2"x2" symbols. <b>MEDIUM:</b> 60 5-second messages on 6 levels. Size: 18"x10"x 5" wedge. 3"x3" symbols. <b>LARGE:</b> 48 6-second messages on 6 levels. Size: 20"x12"x7". 4"x4" symbols. Requires AC adapter (included) and 4 AA batteries.	Symbolic level Gross motor skills Visual acuity or processing aided by background illumination Needs met by multiple messages

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
PORTABLE COMMUNICATOR FOR THE VISUALLY IMPAIRED		\$429.95	Enabling Devices	Provides background illumination of transparent icons. Light touch membrane. Choice of fields: 2, 3, 4, 5, 6, 7, or 8. Four scan modes - Inverse, Automatic, Two Switch, and Step. Adjustable scanning speed (1-25 seconds). Two jacks for one or two switch scanning. Two built in scan switches. 12 Levels with recordable level announcer. Auditory Cuing (can be turned on/off). 600 seconds of recording time and choice of the number of fields to use. Volume control. Removable, adjustable carrying strap. Size: 15"L x 9½"W x 2½"H. Requires 4 AA and 2 D Batteries.	Symbolic level Gross motor skills Visual acuity or processing aided by background illumination Needs met by multiple messages

## THE RESOURCE FOR LITE TECH LOW COST AAC VOICE OUTPUT DEVICES – Toys

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
TALKING SQUARE CONTAINERIZING TOY		\$86.95	Enabling Devices	Single voice output message of 20 seconds activated when shape hits the bottom of the container. All sides of square have shape-sorting walls. Use with larger objects by removing lid Size: 10¾" x 7¼" x 6" 4 AA Batteries	Need for communication training Aids with poor motor control Motivated by voice output Motivated by cause and effect Support independent work Need for developing eye/hand coordination Need for developing problem solving skills
TALKING BUBBLE  TALKING BUBBLE WITH LIGHTS & VIBRATION		\$99.95  \$146.95	Enabling Devices	TALKING BUBBLE: Dome shaped activity box that has 4 colored switches (buttons) and 2 ball pull switches which control a 6-message voice recording chip (2.5 seconds per channel). Size 10 ½" x 5 ½". Requires 4 AA batteries. WITH LIGHTS & VIBRATION: Four 5-second messages. Has lights and vibration.	Encourage manipulation and coordination Motivated by voice output Gross motor  NOTE: These devices were designed to stimulate manipulation
ROBO TALK		\$103.95	Enabling Devices	Records four 5-second messages Push on eyes, ears, nose or mouth and each will play pre-recorded message. Lights turn on when message plays. Can be wall-mounted (hardware included). 8"L x 8"W x 4½"H 4 AA Batteries	Motivated by voice output Motivated by cause and effect Stimulated by special effects Need for communication training Motivated by lights
TALKING PIN SAY IT PLAY IT		\$105.95	Enabling Devices	Four messages, played when pin is moved in different directions. Total of 20 seconds recording time. Four switch output jacks for activation of 4 external devices. Size: 8 ¼"W x 9"H x 7 ½"D. 4 AA batteries	Needs met by four message Motivated by voice output or cause & effect Motivated by novelty device Gross motor skills
TALKING CONTAINERIZING TOY		\$112.95	Enabling Devices	Single voice output message of 20 seconds activated when shape strikes the bottom of the container. Also activated lights Can be used with larger objects by removing the shape sorting lid. Sensitivity can be adjusted to accommodate items of differing weights 4 AA Batteries. Comes with 3 blocks; 1 round, 1 square and 1 triangle. 6¼" x 6¾" 4 AA batteries	Need for communication training Aids with poor motor control Motivated by voice output Motivated by cause and effect Support independent work Motivated by lights Need for developing problem solving skills

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
TALKING BOWLING PINS		\$113.95	Enabling Devices	Single message with 20 seconds total record time. Message spoken when one or all of the bowling pins are knocked over with the 10" soft rubber ball The pins stand 14½" high and the base measures 17" x 17" x 1½" 4 AA Batteries	Motivated by voice output Motivated by cause and effect Good motor control
TALKING BEAD CHAIN WITH LIGHTS		\$125.95	Enabling Devices	Bead chain with digitized speech. Up to 20 seconds of record time Passing hand over light sensor on base will play pre-recorded message while red lights shine Size: 18"L x 8"W x 13"H. 4 AA batteries	Motivated by voice output Motivated by cause and effect Need for sensory interaction Need for communication training Stimulated by visual effects
BOOK TALKER		\$126.95	Enabling Devices	Story reading device to use with book Thin 16-position flat switch array Record each message or text of a page on a segment on the switch. Place a marking sticker on each page over the corresponding segment on the switch Pushing the marker plays the recording 7 different levels with one to sixteen pre-recorded messages Total recording time 300 seconds 17"L x 7¾"W. 4 AA Batteries.	Need for independent activity Motivated by voice output Motivated by cause and effect Emergent reading level Symbolic or graphic level Understands basic concepts of print
STORY TELLER		\$128.95	Enabling Devices	Single 20-second message. Spinning disk holds any small object. Oval textured activation plate. Lights and spinning disk activated with message. Size: 12 ½"L x 9 ¾"W x 4 ½"H. 4 AA batteries.	Object or symbol level Motivated by voice output Need for visual feedback
MR. POTATO HEAD COMMUNICATOR		\$146.95	Enabling Devices	Record up to 8 messages on 6 levels for a total of 288 seconds of recording time. When you insert a body part, message plays. Mr. Potato Head comes with additional accessories. 12"L x 7½"W x 8"H 4 AA Batteries	Motivated by voice output Motivated by cause and effect Good fine motor skills Need for concept development

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
ROLL-A-ROUND SEQUENCER		\$149.95	Enabling Devices	Drop special ball in the top of face, as it rolls down swirling slide, lights flash and music plays in different patterns. Flip switch and toy plays a sequence of pre-recorded messages (storytelling, music, etc). Total record time is 300 seconds. Jack for external switch activation Comes with 3 balls 6 additional balls optional 16"L x 9½"W x 8"H 8 AA Batteries	Motivated by voice output Motivated by cause and effect Stimulated by visual effects
SHAPE TALKER		\$149.95	Enabling Devices	Three voice output messages of 5 seconds are activated when shape is dropped into the container. A message can be pre-recorded for each shape Size: 8"D x 8"H. Requires 4 AA Batteries.	Need for communication training Aids with poor motor control Motivated by voice output Motivated by cause and effect Support independent work Needs to develop eye/hand coordination Need to develop problem solving skills
MATCH AND TALK WITH LEVELS		\$152.95	Enabling Devices	15-level matching communicator Place icons, letters or words in the three icon holders on top and one matching item inside the star icon. Press the textured switch plate to start scanning. Press again to make a match and to play pre-recorded message. Device Auditory cueing that can be turned on or off and adjustable speed scanning. Total record time is 300 seconds, 3 messages per level and 5 seconds per message. 15"L x 11"W x 15"H 4 AA Batteries	Need for concept development Motivated by voice output Motivated by cause and effect Support independent work
PARTS OF A WHOLE PUZZLE		\$194.95	Enabling Devices	Geometric shape maze: move one half of a shape through the maze to match up with the other half. Equipped with knobs to grasp and slide pieces through maze. Record message to play when match is made. Six levels with 300 seconds of recording time. Shapes can be moved to different starting locations so game can be different each time. Acts as switch to turn on device when the puzzle is correctly completed. 17"W x 14"D x 2½"H 4 AA Batteries	Need for communication training Aids with poor motor control Motivated by voice output Motivated by cause and effect Support independent work Needs to develop eye/hand coordination Need to develop problem solving skills

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
PUZZLE COMMUNICATORS		\$246.95 \$157.95	Enabling Devices	Set of 5 talking puzzles. Record messages for each puzzle on a separate level of the communicator. Activate message by either placing or taking the puzzle piece 5 levels with a level announcer for each level Total record time of 300 seconds. Complete set includes the base and 5 puzzles Can purchase Communicator Base and 1 shapes puzzle or additional puzzles can be purchased 13"L x 12"W x 5"H 4 AA Batteries	Need for novelty Good gross motor Motivated by voice output Need for auditory prompt Motivated by cause and effect Support independent work Needs to develop eye/hand coordination
STOVE COMMUNICATOR		\$249.95	Enabling Devices	Sequencer with 300 seconds record time Intended for dramatic play: When pot stirred with special spatula, recording plays Includes pre-recorded sounds such as water boiling & an egg being cracked open & frying Burners are lit with blinking LEDs Includes 3 wooden pots, spatula, spoon and oven mitt which can be stored underneath Volume control for the sounds Size: 14"L x 10"W x 5½"H. 8 AA Batteries.	Need for novelty Good gross motor Motivated by voice output Need for auditory prompt Dramatic or role playing
MAILBOX 6-LEVEL COMMUNICATOR		\$263.95	Enabling Devices	Recordable 6-level communicator which speaks pre-recorded message when a letter is posted. Essentially a sorting communicator since message can only play when proper shaped mail is inserted in special slots. Six wood letters/postcards included. 15"H x 10½"W x 8"D. Needs 4 AA Batteries	Need for novelty Basic gross motor Motivated by voice output Motivated by cause and effect Opportunity for role playing
TALKING SHAPE RECOGNITION BUSY BOX		\$269.95	Enabling Devices	Each shape can have up to a 30 seconds recorded message Shapes have different tactile textures and color. Includes spinning light show, music, and vibration. Table top or wall mount! Size: 14"H x 11"W x 16"D. Requires 2 C, 4 AA and 3 AAA Batteries.	Need for novelty Basic gross motor Motivated by voice output Motivated by cause and effect Need for multiple sensory stimulus options Need for opportunities to explore

DEVICE	PHOTO	COST	MANUFACTURER	FEATURES	CLIENT CHARACTERISTICS
SPEAK AND LEARN COMMUNICATOR		\$390.95	Enabling Devices	<p>Voice output device to support learning through game playing            7 levels with 300 seconds of recording time.            Can be configured to window with 2, 4, 8, and 16 cells Has corresponding key guards            Memory game can that can be personalized to meet individual needs by pre-recording questions and answers. Can program reward (correct) and redirect (incorrect) responses            Includes starter kit which has six overlays            Size: 14¾"L x 12½"W x 6½"H 4 AA Batteries.</p>	<p>Symbolic or graphic level            Motivated by voice output            Fine motor skills for pointing and activation            Motivated by cause and effect            Support independent work            Need for visual and auditory prompts</p>
